About

Computer Science (Datamatiker) student at EK (formerly KEA), looking for job opportunities. I have a strong passion for object-oriented programming and hands-on experience with Java, Spring Boot and MySQL, plus frontend work in JavaScript and React. As an AI intern at Droids Agency I work with agentic Playwright testing, AI workflows and Kubernetes, and I run my own k3s cluster with GitOps and CI/CD. Before coding I spent years as a graphic designer, so I care about how things look and feel, not just how they work.

Experience

Aug 2026 – Nov 2026	AI Intern Droids Agency · Copenhagen – Test automation with agentic Playwright. – Building AI workflows. – Working with Kubernetes.
Nov 2018 – Present	Freelance Graphic Designer Self-employed · Copenhagen – Academy for Socially Engaged Youth (ASU): website design, visual identity and workshop design; external teacher in branding. – Verdensmål i Hænderne: visual identity, social media guidelines and workshop design; external branding teacher for students at FGU Køge. – SOPRA, the Danish Social Services Agency (2021, 2022).
2020 – 2022	Graphic Designer Unknown Agency (creative agency) · Copenhagen – Client presentations, packaging design and illustration for clients including Wolt, SunQuick and Pelican Storage.
Nov 2018 – Mar 2019	Graphic Designer WAWA · Copenhagen – Social media content, ads, brand campaigns and visual identity. – Newsletters, stock updates, and design and launch of new collections.
Nov 2018 – Jan 2019	Graphic Design Intern Design Bridge (creative agency) · Amsterdam – Packaging design, layout, concept development and implementation for major brands such as Toblerone.

Projects

2026	k3s Cluster k3s · Argo CD · GitHub Actions · cert-manager · external-dns · Cloudflare Set up a single-node Kubernetes cluster by hand on my own VPS. A push to GitHub builds a container image, Argo CD syncs it to the cluster, and cert-manager and external-dns handle HTTPS and DNS. It hosts peytonhunter.com and this CV.
2026	NoteHelper Java · Spring Boot · OpenAI API · Docker · GitHub Actions Upload lecture slides as PDF or text and get structured notes, deeper explanations and a quiz, generated through the OpenAI API.
2025	Soundwave Arena Java · Spring Boot · JPA · MySQL · JavaScript Full-stack web app built by a team of four working in Scrum, with GitHub Actions automating tests and deployment before every merge.
2026	n8n Workflow Backup n8n · Docker · GitHub API An n8n workflow that backs up all my automations to GitHub as JSON, so every change is versioned and easy to restore.

Education

Aug 2024 – Jan 2027 (expected)	AP Degree in Computer Science (Datamatiker) Copenhagen School of Design and Technology (EK, formerly KEA) · Copenhagen – Java, Spring Boot, JPA, MySQL, JavaScript, system development and Scrum. – Electives: Introduction to Python; AI Agents and Automation (n8n).
Dec 2022 – Jun 2023	Frontend development course SheCodes (online) · Copenhagen – HTML, CSS, JavaScript, working with APIs, Bootstrap and React.

Skills

Languages	Java, JavaScript, Python, SQL, HTML, CSS
Frameworks	Spring Boot, JPA, React, Tailwind, Bootstrap
DevOps	Kubernetes (k3s), Argo CD, Docker, GitHub Actions, Linux, Git
Testing and AI	JUnit, Playwright, n8n, OpenAI API
Ways of working	Object-oriented programming, Scrum, Jira
Design	Visual identity, Branding, Packaging design, Illustration, Workshop design
